SUMMARY

Software Engineer motivated by supporting sustainability; whether it be through increasing environmental awareness, making good personal health choices or developing meaningful and passionate connections with the people in my life.

SKILLS

- HTML
- CSS
- Javascript
- JQuery
- AJAX
- React.js
- Ruby on Rails
- mongoDB
- Bootstrap
- Node.js
- git
- Github
- Ruby

EXPERIENCE

General Assembly — Software Engineer Fellow

January 2020- PRESENT

- Starting with minimal knowledge of programming languages I built a fully functional recipe search application accessing a third party API with filtered results after six weeks.
- 2 weeks later, I made a full CRUD app using mongodb, express.js and hosted on heroku
- In the following 3 weeks, I helped make a movie review site in a group setting using react.js and hosted on heroku

MRD — Assistant Project Manager

June 2017 - December 2019

- Manage electrical installation teams working on cruise ships to completely replace old lighting systems with newer more efficient systems. Responsibilities included: meeting with department heads for best operational execution.

EDUCATION

General Assembly — Software Engineer Fellow
